Power BI Desktop−Power BI Pro−Power BI Premium

Power Bi	Desktop	Pro	Premium
Basic business	Preferred	Cost effective	Mostly suitable for large business needs.
How to get	It is basically comes with Micro soft 365 active tools we can get this versions , and a good initiative to start the visualization. And it comes with the basic packages with windows server 2012R2 and server versions.	If the business need is more, and it is full fledged version of Power Bi desktop	It is Mostly available as SaaS deployment as a cloud supportive on MS Azure. It is the most expensive version of the power BI
Licensing &&users	Here the licensing can be shared through the users.	For every user we have to buy the individual license.	Here we are not buying the user license based on the data we have to process across the nodes and visitation reports stores the data ,it can be decided .
Sources supported Data source	Even though it is desktop version supports maximum of all data formats and connectors around 70 rich visualizations storage limit of 10GB.	With all the possibilities And added advantage over Power bi desktop with building datasets ,and perform the results into SharePoint, PowerApps, Teams.	It is also supports all data connections and data size there is no limitation we can increase the virtual cores based on our use and price.—
Preferred for	Small and medium size organizations for their end to end visualizations.	Mostly for the big organizations.	Completely for the Enterprise Platform.
Prices	Free for single user with the office 365 subscription.	**$9.99** per user monthly	**$4995/-** per monthly
